

Who is the Roscrea/Birr SCP for?

The SCP is a targeted services for children and young people who require additional support to get the most from their education. It is not open to all pupils and students.

Children and young people must be referred to the SCP. Schools, parents and other agencies can refer.

Once a referral is made, then the SCP will see if SCP is the best support for the child. Not every child who is referred will receive a support.

If you are interested in finding out more, please contact the Roscrea/Birr SCP project coordinator or your Home School Community Liaison Coordinator.
